

Final Presentation

TaskFlow AI

Turn Your Email Chaos into Actionable Tasks

Date

2nd December, 2025

Course

COMS 6113

The Problem We Solve

Email is where work appears, not where work gets done

01.

Action Items Buried in Email

Deadlines, forms, and reminders hide in **long threads and auto-emails**. People reopen the same messages just to remember what to do.

02.

Manual, Repetitive Triaging

Turning email into tasks or events means **copy-pasting** into other apps and **adding dates and links by hand**.

03.

Inefficient Task Management

Tasks are split across stars, calendars, notes, and apps, leading to **missed follow-ups** and **constant context switching**.

Challenges in the Market- User Story

Identify Key Problems

- Lack of real-time data solutions for SMEs
- High operational costs due to inefficient systems

User Pain Points

- Businesses struggle to stay agile
- Lack of tech integration slows growth

Our Solution

The Inbox Knows Your To-Dos. It
Just Doesn't **Act** on Them.

!

**Emails already contain the
raw information**

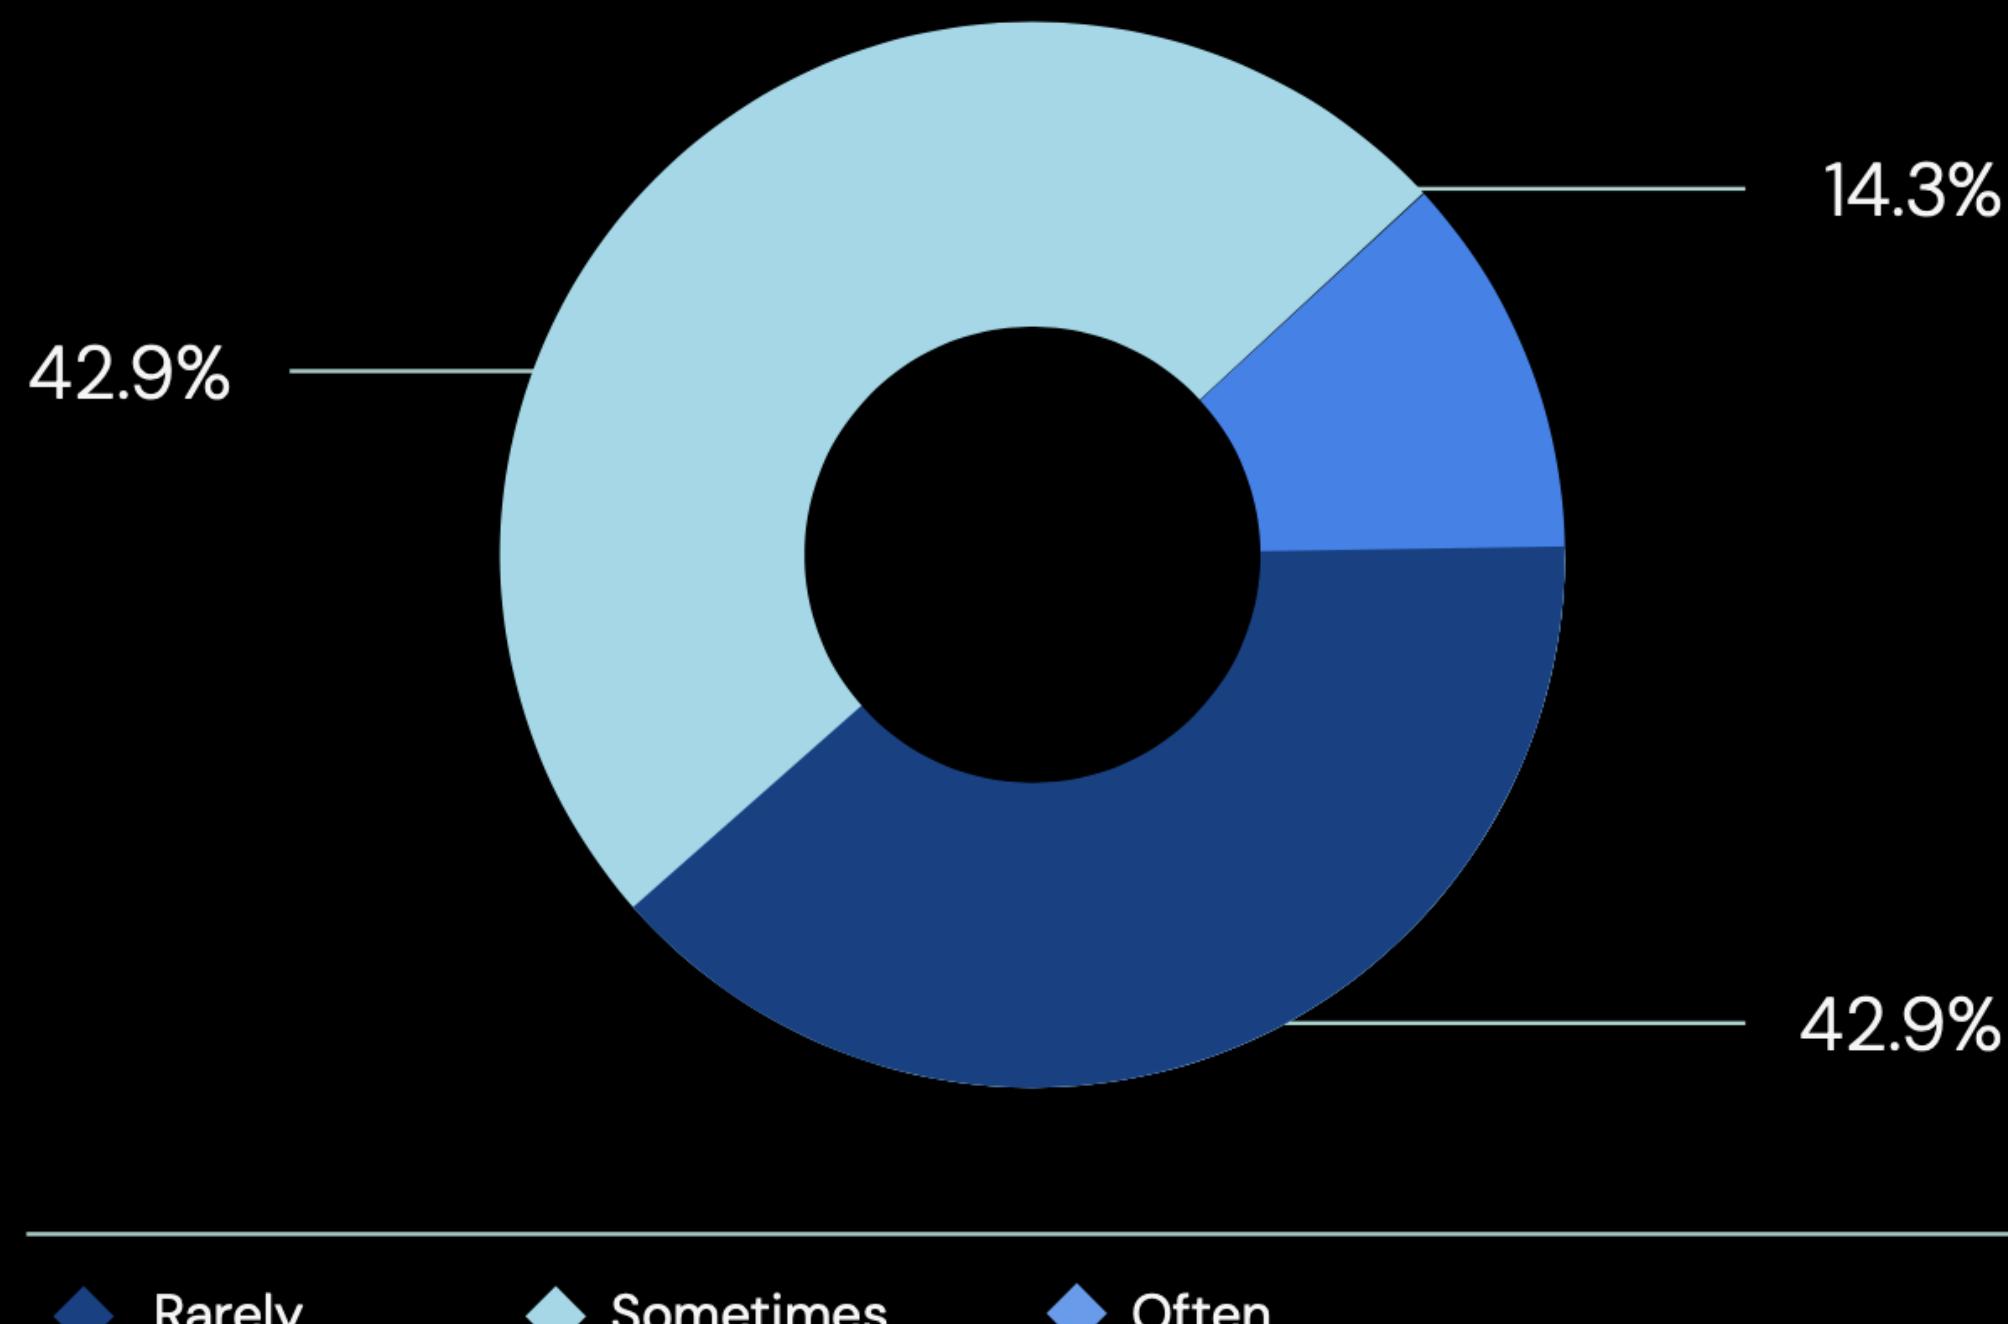

What? when? who?
urgency..
Everything can be found in
the mails

But Gmail is optimized for
Communication not
Execution

**TaskflowAI comes into
place!**

We can classify emails
automatically, so the inbox
becomes a workflow engine

DEADLINE MISS FREQUENCY

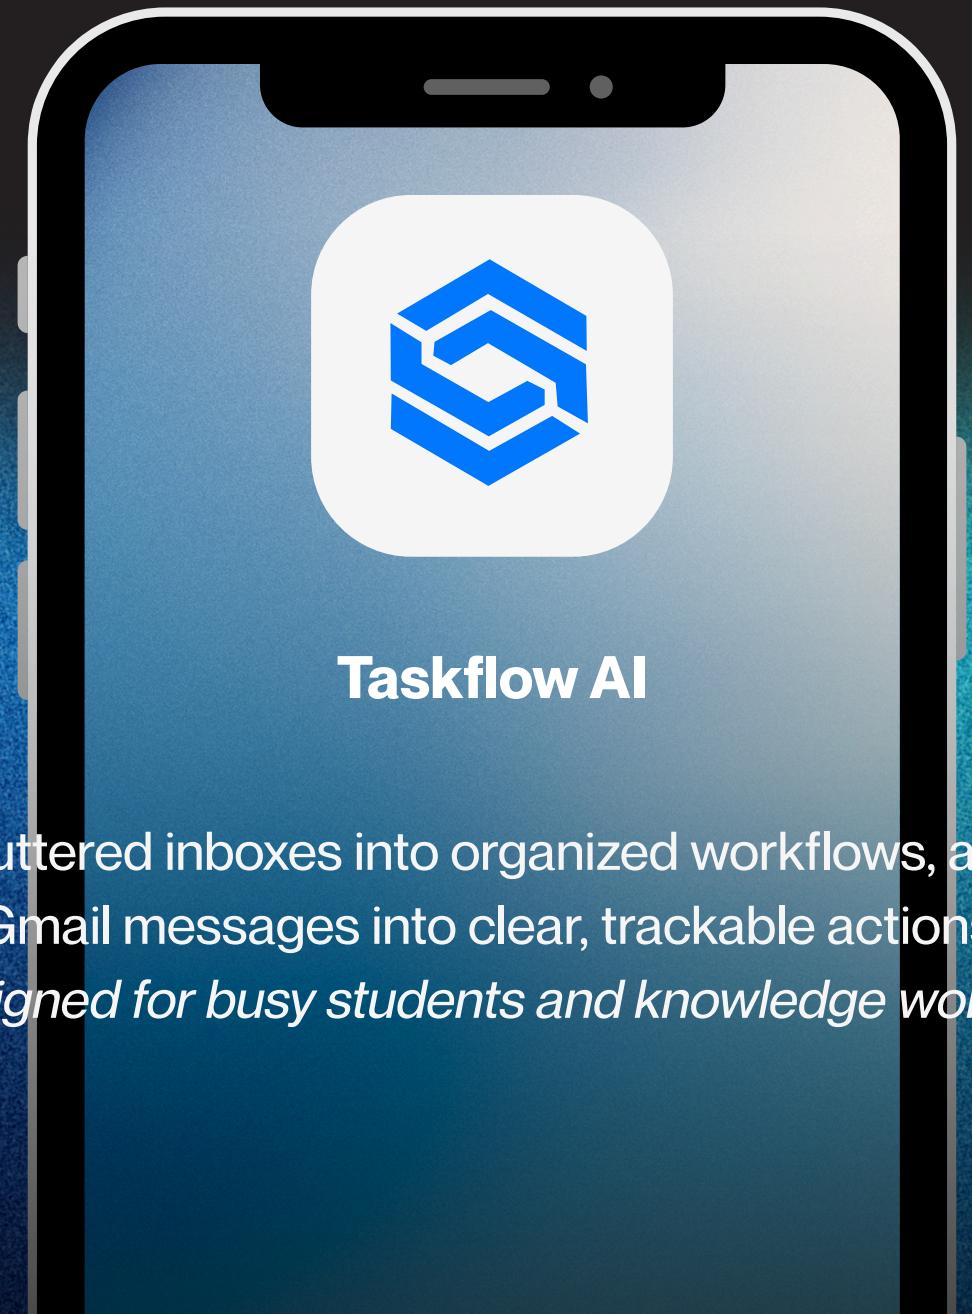

>50%

People miss or delay tasks because they
are buried in emails

71%

Responders would definitely use a tool that
helps them address this issue.

Introducing TaskFlow AI

Taskflow transforms cluttered inboxes into organized workflows, automatically converting Gmail messages into clear, trackable actions.

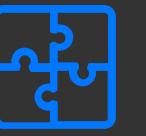

Designed for busy students and knowledge workers

What Task Flow AI Does

Centralized Workspace

All-in-one platform to manage communication, tasks, and collaboration with full visibility.

Modular Integration

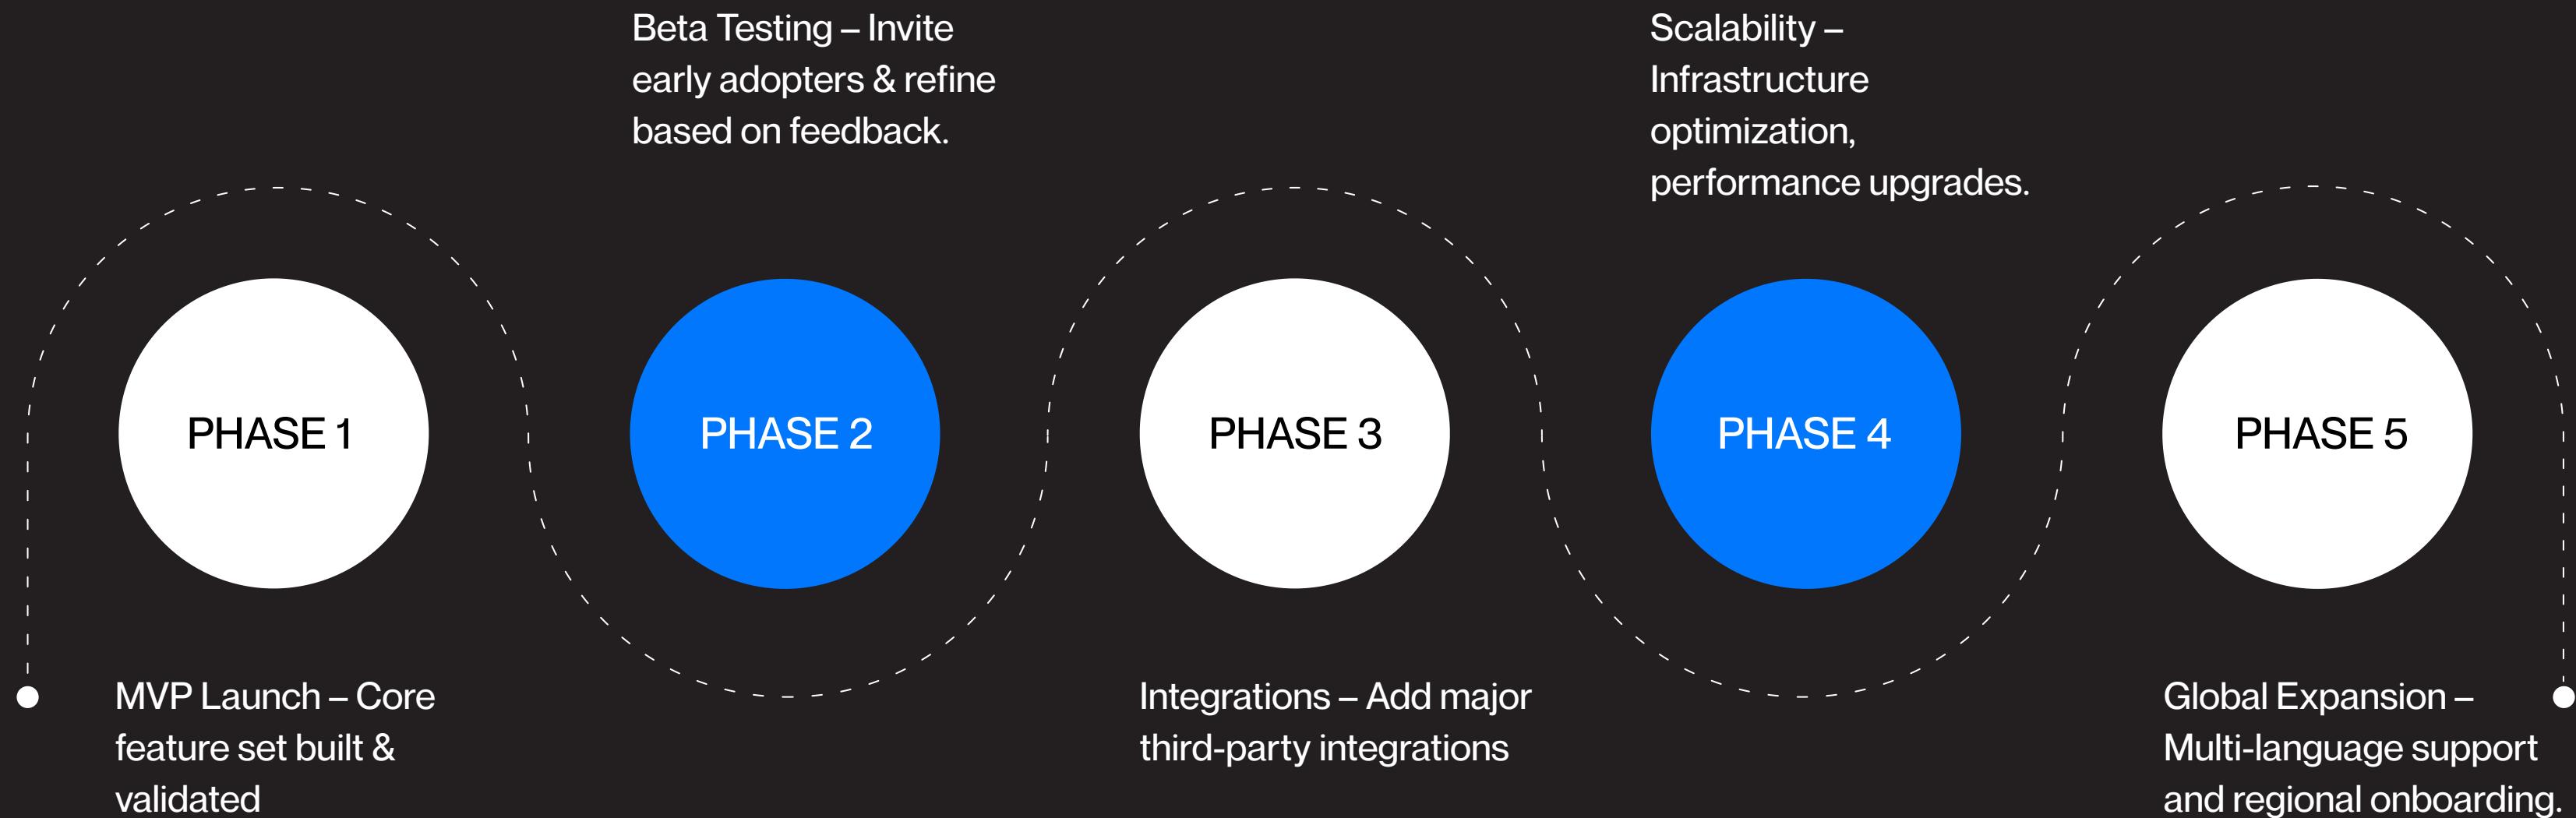

Customizable tools that adapt to your team's needs — no more one-size-fits-all solutions.

Global Access, Local Control

Cloud-based platform enabling teams to work securely from anywhere, with region-specific compliance.

Typical Flow for User

System Architecture

“Our platform is packed with powerful features designed to streamline your workflow, enhance user engagement, and scale with your business. Each feature is built with simplicity, speed, and impact in mind.”

Seamless Collaboration

Real-time editing, comments, and task updates across departments.

Cloud Sync & Backup

Automatic saving and synchronization across devices and teams.

Smart Communication Tools

Built-in chat, voice, and notification system keeps everyone aligned.

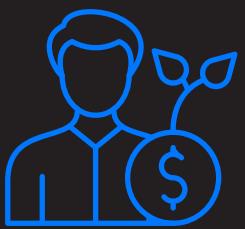

Workflow Automation

Drag-and-drop automation for routine tasks, saving time and effort.

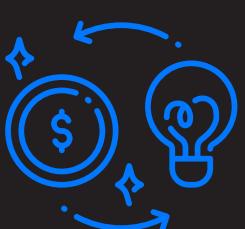

Frontend overview

Startups often raise capital through angel investors, venture capital, or crowdfunding to scale their business.

Bootstrapping

Self-funding through personal savings or revenue.

Venture Capital

Investment from firms that focus on scaling high-growth companies.

Angel Investors

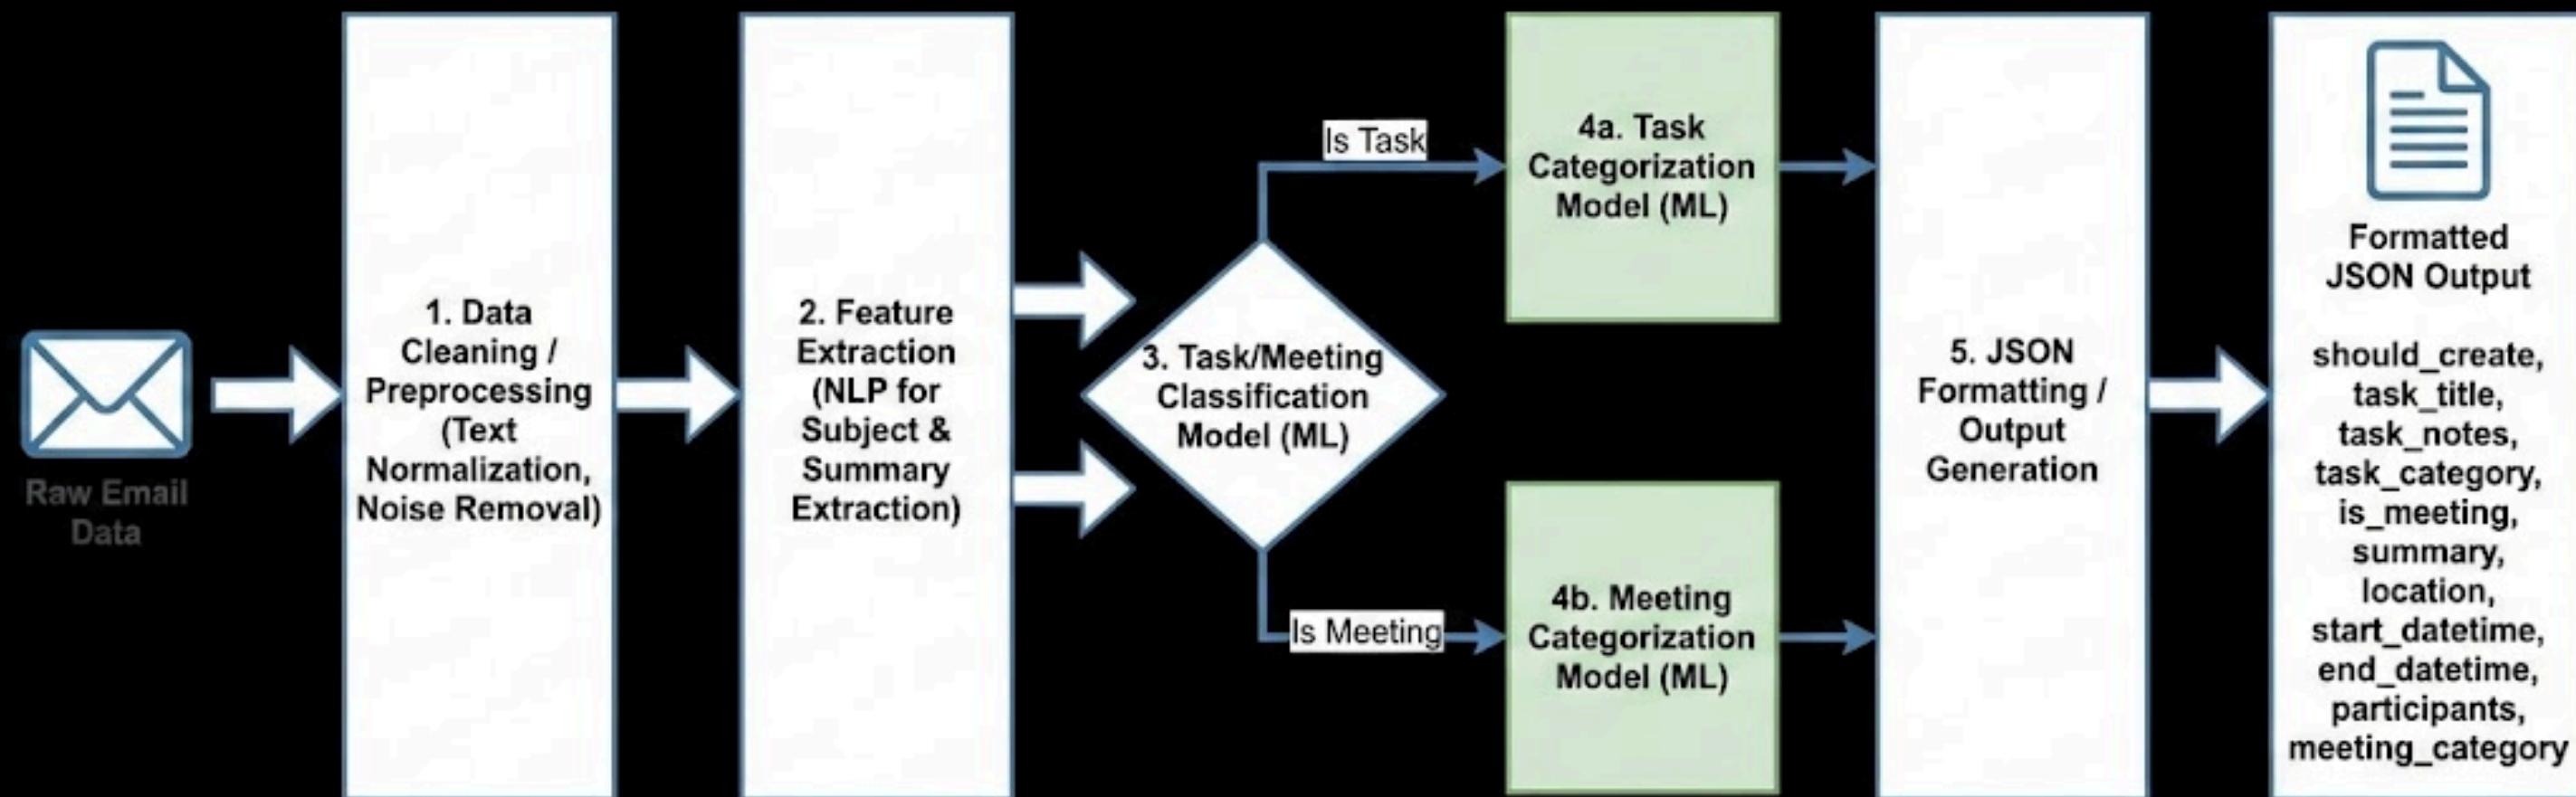

Individual investors who provide early-stage funding.

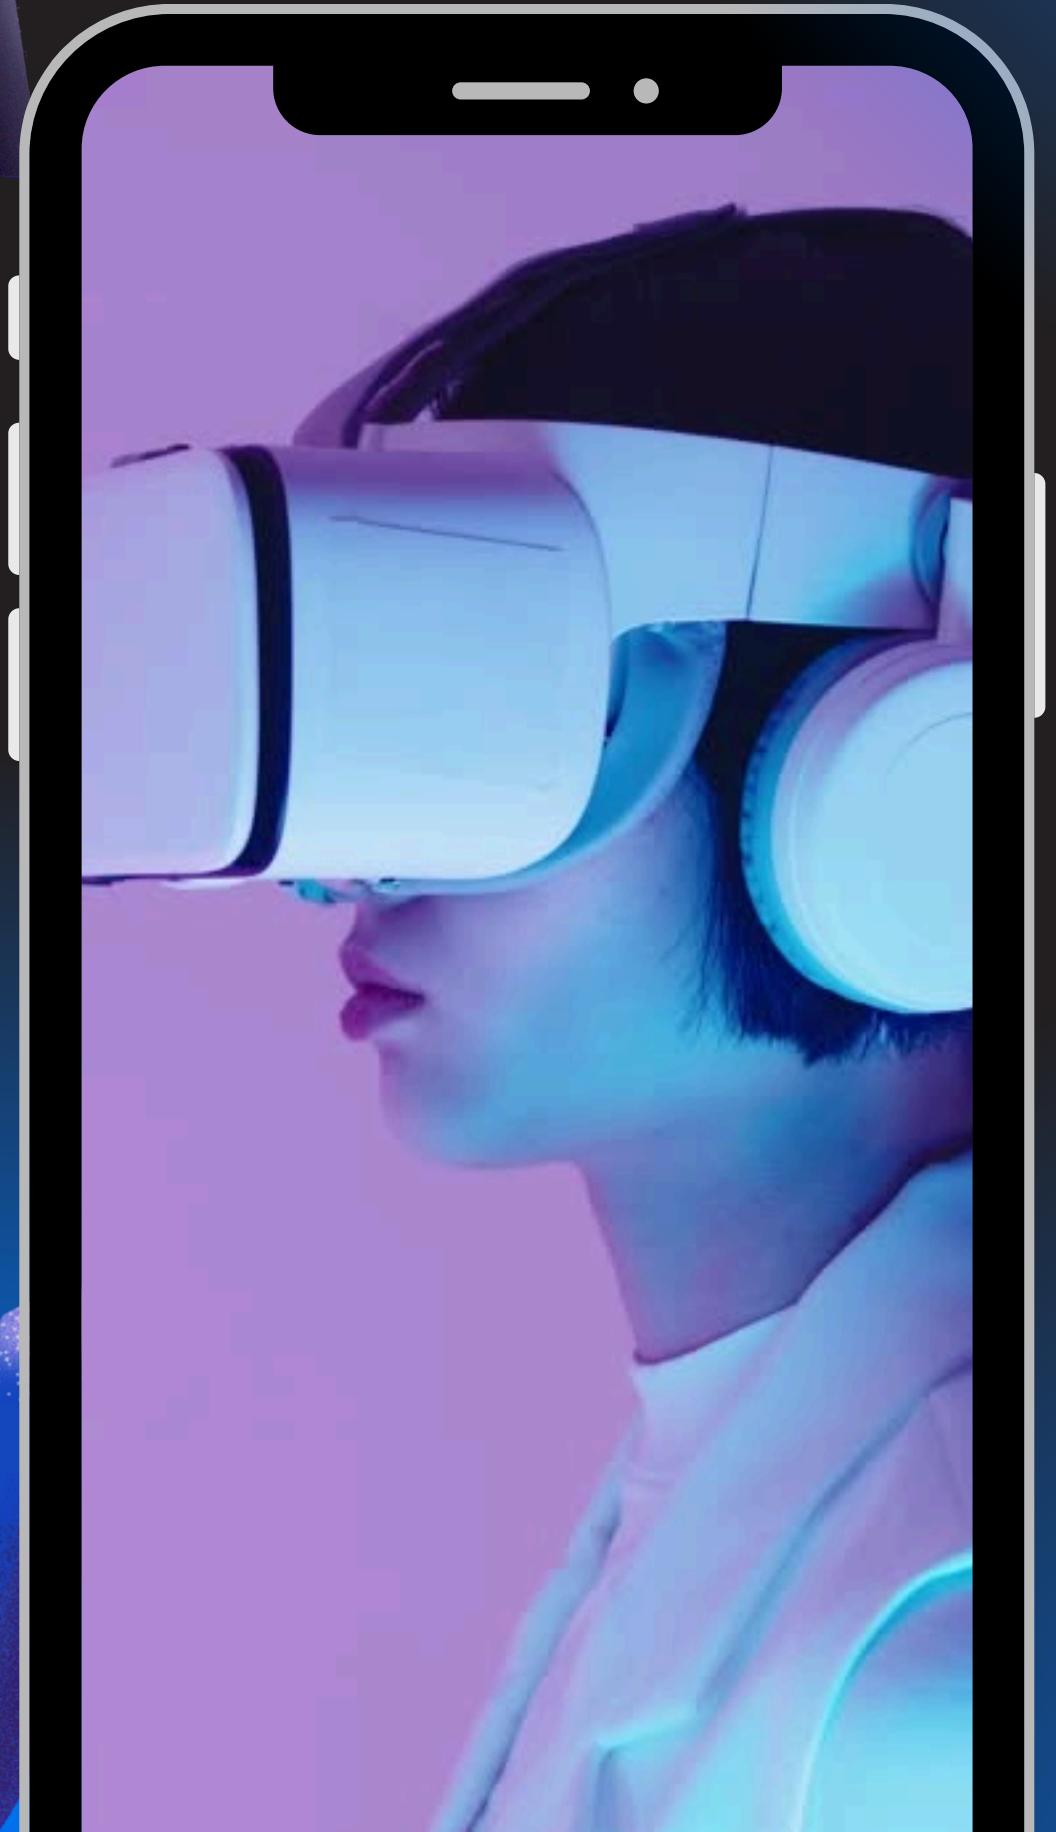

Crowdfunding

Raising small amounts of money from a large number of people.

Machine Learning

Built

to support your brand
growth

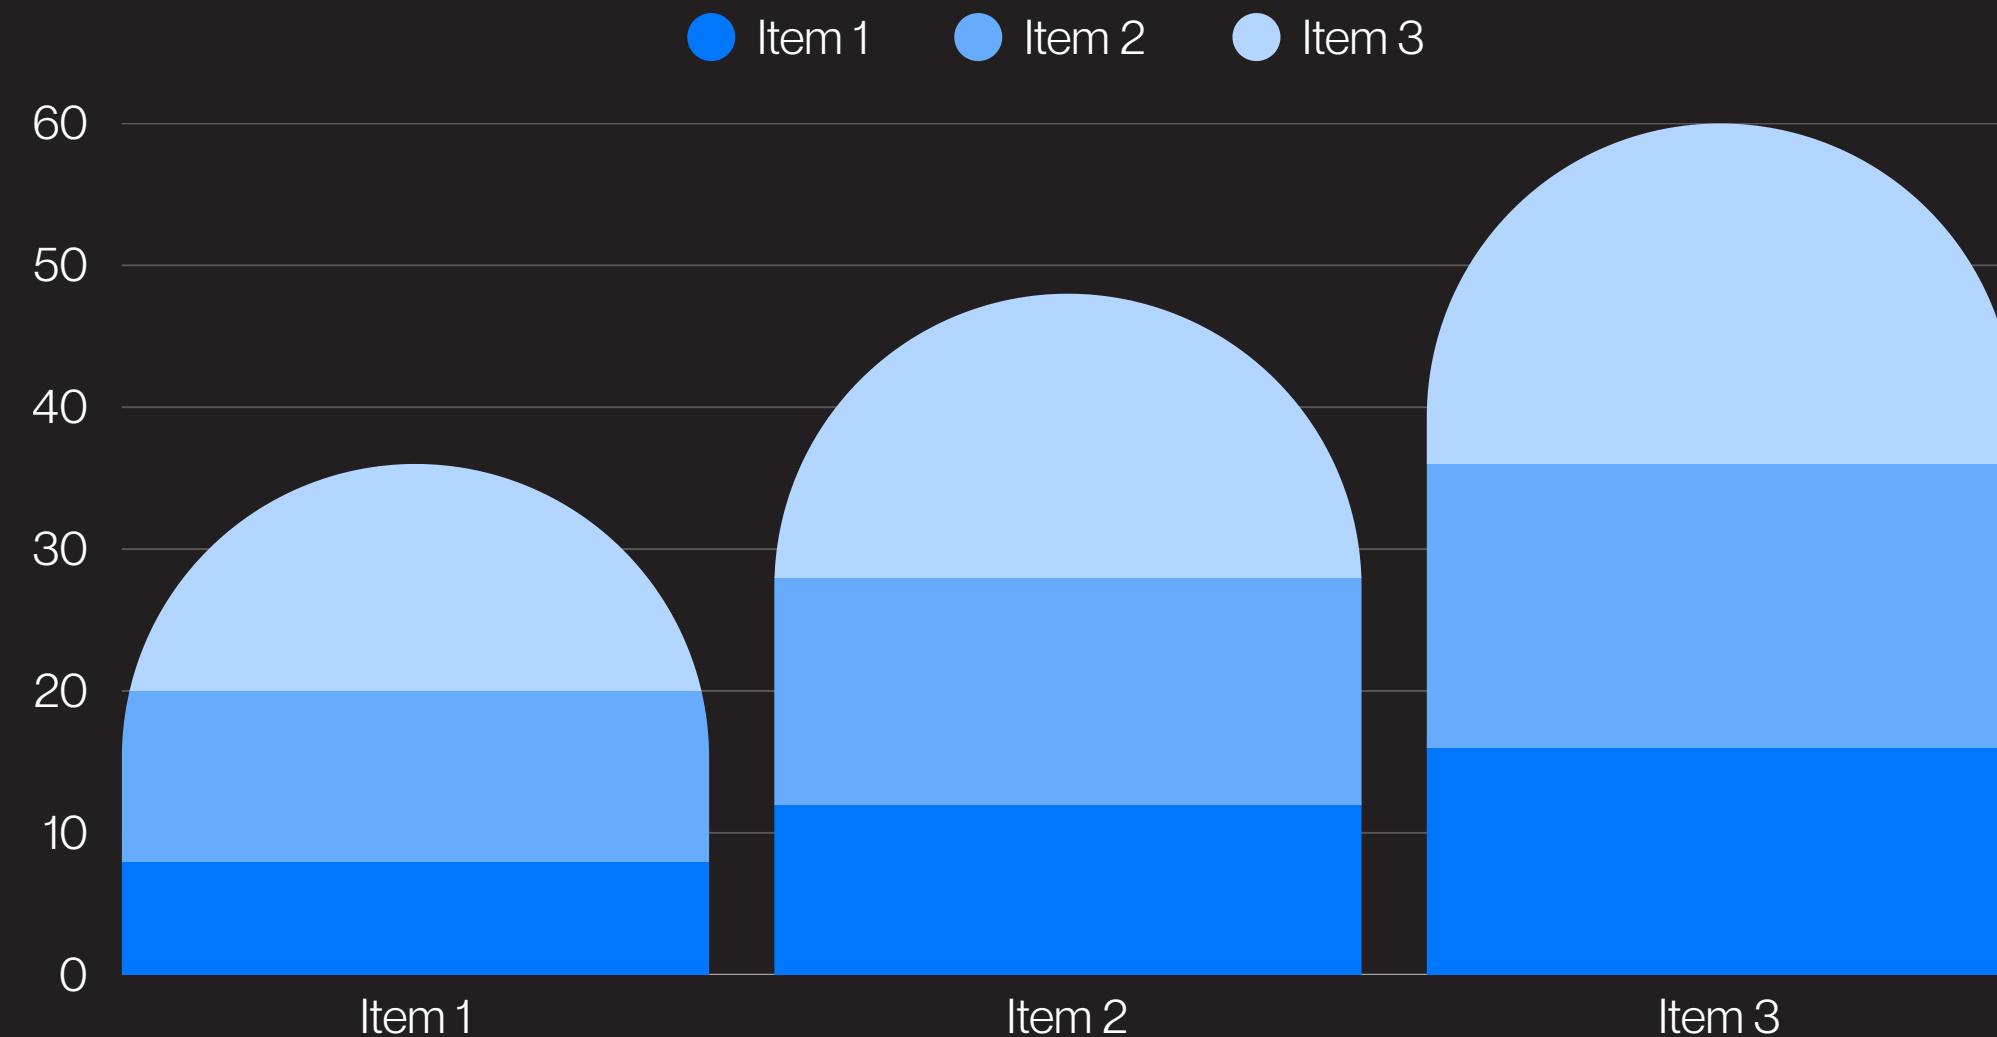

Designed

for improved operational
efficiency

Suited

for swiftly changing
business needs

Impact of our work

Our business model is designed for long-term growth and sustainability, combining multiple revenue streams with scalable solutions that deliver value to both customers and stakeholders.

Subscription-Based SaaS

Tiered monthly plans based on user limits and features.

Usage-Based Billing

Clients pay based on activity volume or API calls.

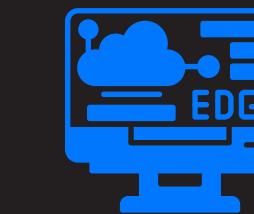

Model 3

Tailored pricing for large clients with dedicated support.

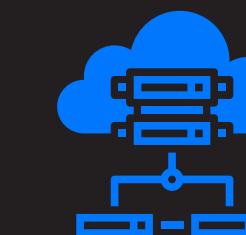

Future work and limitations

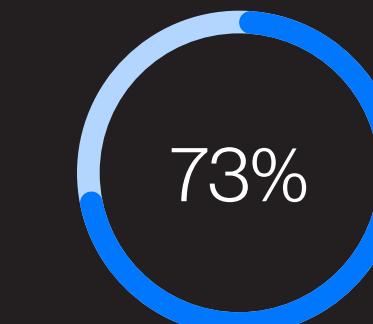

Edge Computing
